DAILY INSPECTION

Daily Inspection - A Compliance service in Volvo Connect

Volvo Connect is one single interface for your fleet and business where you can manage vehicles, trailers and all other assets of importance.

Facilitates the daily walkaround check

The Daily Inspection service in Volvo Connect digitalises the daily walkaround and allows the driver to complete and report the walkaround with support from their smartphone or tablet.

Traditionally, walkaround checks are completed manually, which can be time-consuming and costly and could cause vehicle downtime and miscommunication if defects are not reported effectively.

Using the Daily Inspection tool, any defects that are noticed during the walkaround check can easily be reported. The driver can take a photo of the defect and include their own notes, and once the walkaround check is fully completed the defect is recorded in Volvo Connect. Thus, the recorded defect can be scheduled with the next planned service of the vehicle. Further, the administration costs of a paper-based way of working are reduced.

UPTIME

- Helps avoid breakdowns and unplanned stops.

SAFETY

- Making sure that the vehicle is in good condition reduces the risk of accidents.

PRODUCTIVITY

- Defects that are noticed early can be scheduled with the next planned service.

FACT SHEET

DAILY INSPECTION

The Daily Inspection tool provides recommended checks while having the flexibility to create bespoke check sheets in line with the operation's specific needs.

In some countries, regulations may demand that daily walkaround checks are performed and the customer may receive benefits if they can show that they have good control over the fleet. With Daily Inspection, all completed walkaround checks are stored electronically in Volvo Connect.

The driver has access to their own completed checks and in case of a roadside inspection, the driver can demonstrate the current and previously completed walkaround checks. The transport manager will have direct access to all completed walkaround checks in Volvo Connect to help manage the fleet compliance and avoid unplanned stops, fines and accidents.

The Daily Inspection service is also available as an app. To access the Daily Inspection App, users can find it in both Apple App Store and Google Play.
