

## FACT SHEET

# SYGIC NAVIGATION

While delivering goods or services to many customers, every additional minute spent on the road counts. Therefore, preparing ahead and planning the route most efficiently is crucial. Optimise your journeys with the advanced navigation system by Sygic, providing practical features tailored to your needs.

Sygic Navigation is fully integrated into the side display, while also offering clear route guidance directly in the instrument display.

Choose among the fastest, shortest, or most energy-efficient route to a destination, considering truck attributes and road parameters like bridge heights, axle pressure restrictions, sharp curves, and ADR restrictions. This ensures a tailored journey that fits your requirements.

Sygic Navigation is fully integrated into the displays of the truck.

### PRODUCTIVITY

- Swift and precise navigation assistance that seamlessly guides the driver to the desired locations, using the best routes available according to your specific need.

### DRIVER APPEAL

- Stay connected — get the latest maps, continuous updates, and a user-friendly interface for effortless and up-to-date navigation.

### ENVIRONMENT

- Legal emission zone restrictions are considered, ensuring that the proposed routes stay pollution-free in restricted areas for a straightforward and eco-friendly driving experience.

## FACT SHEET

# SYGIC NAVIGATION

Connectivity is at the forefront with integration into Volvo Connect, allowing sending routes and destinations directly from the office. Real-time updates on traffic along the route keep you ahead of traffic and ensure the most efficient route to your destination at any given time.

The route can easily be customised with waypoints, for a tailored journey. In addition, Sygic Navigation provides safety and assistance features like lane guidance, preferred right or left turn, and reaching the destination in the driving direction, which can help prevent dangerous situations and simplify the work of the driver.

Sygic navigation can be used in a connected mode or offline, where the connected mode enables live traffic and fully automatic map updates. With offline maps you can navigate confidently also in areas without internet connection.

**Note! For Sygic Navigation to be enabled in the truck, the service agreement must be accepted and the service must be activated in Volvo Connect.**
