### **INHEALTH, THE UK'S LEADING PROVIDER OF MOBILE MEDICAL DIAGNOSTIC SERVICES, UPDATES ITS FLEET WITH THREE NEW VOLVO FH TRACTOR UNITS**

**The UK's largest specialist provider of mobile diagnostic and healthcare solutions, InHealth, has recently taken delivery of three Volvo tractor units. The new FH's will have in-service performance levels directly compared with two vehicles from another manufacturer, which arrived at the same time.**

*"Our business requires modern trucks with low emission standards. These combined with our low mileage operations, help reduce our carbon footprint," reports Graham Ogden, Director of Operations at InHealth. "Due to the nature of our work, InHealth vehicles must be presented and maintained to industry leading standards. Being placed within NHS premises or parked in the centre of a community, the Volvo FHs and trailers must also demonstrate our dedication to quality," Graham adds.*

Supplied by Tony Jones, Transport Solutions Executive at Volvo Truck and Bus Centre London's Banbury dealerpoint, the Euro 6 Step D 6x2 pusher axle tractor units have a power output of 500hp. InHealth has specified Volvo's Globetrotter XL Cabs on 3.9m wheelbase chassis. The FH's also come with Alcoa Dura-Bright alloy wheels, which complement the company's fresh looking white and blue livery. The trio were ordered with five-year Volvo Service Contracts. InHealth will monitor the performance of the FH's with Dynafleet, Volvo's fleet management system.

Cont/.....

*Based in Warwick, Volvo Trucks UK & Ireland provides complete transport solutions for professional and demanding customers by offering a full range of medium to heavy duty trucks through a network of 85 dealerpoints, as well as solutions for financing and service. In 2018 Volvo Trucks delivered more than 6,300 trucks to customers throughout the British Isles. The company is part of the AB Volvo Group, which is headquartered in Gothenburg, Sweden and is one of the world's leading manufacturers of trucks, buses and construction equipment, drive systems for marine and industrial applications and services. All the Group's activities are based on its core values of quality, safety and environmental care.*

*“Our drivers are regularly away for days on end, the cabs are their homes and offices, so their input into which trucks were purchased and the associated specifications were paramount in our decision-making process. We opted for Volvo’s range topping, Globetrotter XL Cabs with One Bed Living packages and a number of extras. The drivers have also added some enhancements to the interior, such as custom fitted mats. Subtle finishing touches like this add to the trucks’ personal appeal, without diminishing our corporate image. The FH’s haul bespoke trailers from makers such as Lamboo, Smit Medical and Bence, which provide very specialised healthcare services. It normally takes between two and three hours to set up a trailer on-site and the same amount of time to pack it correctly before moving off again,”* Graham notes.

The new Volvos join a fleet of 35 trucks and 110 trailers at InHealth and the group operates across the entire UK from the company’s fleet base in Bicester.
