NEW VOLVO FM RIGID MAKES A SOLID START AT ELEGANT STONE

Elegant Stone is already noticing significant fuel savings, as well as a greatly improved driver working environment, from its new model Volvo FM 8x2 rigid.

The architectural cast stone manufacturer has upgraded its two-truck delivery fleet with the new Volvo FM, equipped with a completely revised Globetrotter cab and featuring a fully digital 12-inch high-res instrument display, that replaces an older truck from a rival manufacturer.

Rory Davis, Sales Manager at Elegant Stone says: "This is our first Volvo truck and it's really hit the ground running. We considered several manufacturers for this order but Volvo gave us the best combination of quality product at a good price. The old unit was doing around 8 mpg but the FM is currently delivering 12 mpg – a big saving for us in the long run.

"We've always opted for a 6x2 axle configuration in the past, but we've gone for 8x2 this time which allows us to get another four and a half tonnes on. We're carrying architectural cast stone, a very heavy product, so this gives us some additional flexibility to increase the load when we need to."

Supplied by Jason Robinson, Area Sales Manager at Crossroads Truck & Bus, the FM rigid is powered by Volvo's D11K engine, producing 330 hp and 1,600 Nm of torque. Elegant Stone will be using the truck to transport deliveries from its factory in Bradford down to building sites in London and across the south east.

Cont/.....

Volvo Trucks provides complete transport solutions for professional and demanding customers, offering a full range of medium to heavy duty trucks. Customer support is secured via a global network of dealers with 2,300 service points in more than 130 countries. Volvo trucks are assembled in 13 countries across the globe. In 2020 approximately 94,000 Volvo trucks were delivered worldwide. Volvo Trucks is part of Volvo Group, one of the world's leading manufacturers of trucks, buses, construction equipment and marine and industrial engines. The Group also provides complete solutions for financing and service. Volvo Trucks' work is based on the core values of quality, safety and environmental care.

The FM has been fitted with a curtainside body by Micra Truck Bodies and benefits from Volvo's drive plus package, as well as the long haul fuel package which includes I-See predictive cruise control.

Volvo's latest version of the FM is packed full of improvements and clever innovations that deliver a higher level of comfort, safety and productivity for the driver. A lowered door line, new rear-view mirrors and a passenger corner camera improve visibility, while the new Globetrotter cab – featuring a 28-litre rear upper wall mounted fridge – has raised A-pillars that give it up to one extra cubic metre of space and more light than its predecessor.

"Probably about 80 per cent of our goods are taken down south, mainly to big one-off properties in the home counties and the surrounding London area. So, quite long journeys," says Davis.

"The driver is very happy with the new truck. His maiden voyage was an overnigher and he fed back to us how much more room and storage there was. The digital dashboard was a big hit as well. Driver shortage is a big issue at the moment, so it's important we do what we can to improve the quality of life out on the road."

Elegant Stone is a family run business established in 1998. It is a bespoke manufacturer of cast stone, making both wet cast and semi dry components.
